BERETTA

Fabbrica d’Armi Pietro Beretta

The oldest firearms manufacturer in the world. Founded in 1526 and based in Gardone Val Trompia, Italy. The company remains under the leadership of the Beretta family for 15 generations, making it one of the world’s oldest family-owned and family-run businesses.

Beretta’s firearms have been adopted as the standard weapon by many armed forces, elite units and law enforcement agencies worldwide. Combining traditional craftsmanship and investments in the latest technologies has led Beretta to become one of the top players in the Military and Law Enforcement market as well as the Hunting and Sporting sectors exporting weapons to over 100 countries.

BERETTA

Beretta Defense Technologies

Beretta Defense Technologies (BDT) is a single-source solution provider offering one of the most comprehensive portfolios in the Defense and Law Enforcement market.

By integrating weapon systems, firearms, ammunition, optics, electro-optics, apparel, and accessories, BDT enables customers to streamline procurement processes, reduce time and costs, and simplify system integration.

All solutions are custom-tailored to operational needs, ensuring optimal performance, interoperability, and mission effectiveness across modern combat and policing scenarios.

TECHNICAL SPECIFICATIONS

The **1301 TACTICAL** is designed for professionals who demand absolute reliability and high performance. It combines cutting-edge features with uncompromising functionality. The oversized charging handle, large textured bolt-release, and reversible safety button ensure fast, intuitive operation in all conditions. The aggressively checkered fore-end and stock provide a firm, secure grip—even when wearing gloves.
Equipped with a rugged, protected ghost-ring sight system, the 1301 Tactical offers rapid target acquisition when it matters most. Its interchangeable choke system provides exceptional versatility, allowing the shotgun to adapt seamlessly to a wide range of operational needs and shooting styles.

1301 C-UAS

TECHNICAL SPECIFICATIONS

The 1301 platform has established itself as one of the best combat shotguns on the market. It features an oversized charging handle, a large textured bolt-release, an oversized reversible safety button, and an innovative competition lifter—elements that make all controls intuitive and easy to operate in professional scenarios. The M-lok compatible forend features an aggressive checkering present as well on the stock making it easy to gain a secure grip even while wearing gloves and in high stress situations. An interchangeable choke system allows for maximum flexibility based on use and needs. The **1301 COMP C-UAS** is intended to be a further solution. Retaining all the core technical specifications of the 1301 Tactical in terms of ergonomics and reliability, it introduces an aluminum trigger pack to improve balance and robustness. The barrel is longer and equipped with a tapered rib specifically designed to engage flying targets at extended distances. A picatinny is also offered to mount optics.
